

## RELEASE NOTES OF NEW FEATURES AND ENHANCEMENTS FOR TRIALDIRECTOR VERSION 6.4.960

### Presentation

- › **SMART Board Integration** - TrialDirectorPresentation Preferences now includes a SMART Board section featuring the ability to map pens, color options and the eraser to TrialDirector presentation tools. For example, the user can assign the SMART Board black Pen Tool to the TrialDirector arrow annotation.
- › **Presentation Whiteboard** - The new Whiteboard feature is now available within the Application Tool section of the Presentation toolbar. This feature will load a blank whiteboard canvas onto the presentation stage which can be used with any of the annotation tools or stamps. The whiteboard canvas can also be saved to a Snapshot or SaveStage object.
- › **New Laser Pointer** - A new Laser Pointer tool is now available within the Application Tool section of the Presentation toolbar. This feature will change the mouse cursor to resemble a red laser pointer.
- › **Improved Loading of Large Documents** - An issue was corrected that caused TrialDirector to stop responding when loading large PDF documents (>1,000 pages).
- › **Faster Launching of Presentation Preferences** - The Presentation Preferences screen will now load in approximately 1 second.
- › **Additional Hot Key Options** - The following keyboard shortcut options have been added and may be enabled in Presentation Preferences:

#### Stage Tab

- › Replace Zone
- › Push Zone

#### Exhibits Tab

- › Synchronization Highlight Height
- › Closed Caption Font
- › Display Font
- › Only Show Fixed Width Fonts

#### Tools Tab

- › Redaction Border Thickness
- › Show Border

- › **Improved Viewing with High Contrast Display Settings** - The Presentation Preferences screen better displays text within the “Exhibits” and “Tools” tab when using high contrast display settings.

## Transcript Manager

- › **Print Transcripts with Emphasized Issue Codes** - By enabling the new “Emphasize Issues” option, users may now Print (or Print Preview) the current transcript with selected issue codes/designations italicized and bolded for easy review. Alternatively, users may choose to print a document containing only the emphasized issue codes/designations with accompanying page/line transcript references.
- › **Create Microsoft Word or Adobe PDF Documents with Emphasized Issued Codes** - By enabling the new “Emphasize Issues” option, users may now create a Microsoft Word (.DOC) or Adobe PDF document from the current transcript with selected issue codes italicized and bolded for easy review.

## TimeCoder

- › **New MPEG-4 (H.264) Support** - TrialDirector now supports playback, clip creation and clip export for digital video transcripts using high definition MPEG-4 (H.264) video.
- › **Extended Deponent Information Fields** - Additional information fields are now available to users when creating new Digital Video Transcript projects within TrialDirector. New fields include: Case Name, Matter Number, Client ID, Job Number, Office and Reporting Firm. Additionally, each of these fields “remember” previously entered information (i.e. Case Name) that can be selected the next time a transcript is created from the same case. These fields may be edited at any time via the Digital Video Transcript Properties dialog.
- › **Larger Multimedia Window** - Users can now review deposition videos in a larger video window that is compatible with modern video resolutions and enables easier viewing of dates and time stamps.
- › **Notification of Incomplete Deposition Information** - Users are now prompted if all required fields are not completed when creating a new Digital Video Transcript.
- › **Link to View Original Transcript** - To assist users entering deposition information, a link to view the original transcript is now available during most of the “Create a New Digital Video Transcript” wizard.

## Document Manager

- › **New “Make Video from MultiPlayer Workbook” Feature** - Users now have the ability to create a single MPEG file containing DVT Clips from multiple deponents, deposition volumes and regular media clips. The MPEG file is created by placing clips into the MultiPlayer Workbook, right-clicking the workbook and selecting “Make Video from MultiPlayer Workbook” option. TrialDirector will then encode a single MPEG file that combines the testimony of each deponent in order. Any supported file type (MPEG-1, MPEG-2, MPEG-4, QuickTime, WMV, MP3 etc.) can be used as well as single segment and multi-segment DVT Clips and users can combine mix regular media clips with DVT

clips. Non-multimedia items (PDF Documents, Photos etc.) contained within the MultiPlayer workbook will not be included in the output MPEG file.

- › **Multi-Page PDF Documents Loaded without Suffix on First Page** - Multi-page PDF documents will now load using the original filename (up to 40 characters), without a -001 suffix on the first page.
- › **Ability to Add Multi-Page (TIFF and PDF) Documents from Mapped Network Drive** - An issue was corrected where multi-page documents would not load properly from a mapped network drive.

## Video Utilities

- › **.MP4 and .MOV Files May Be Transcoded to MPEG-1 or MPEG-2** - MPEG-4 (.MP4) and Quick-Time (.MOV) files have been added as input options in the MPEG Transcoder Utility for transcoding to MPEG-1 or MPEG-2.
- › **Ability to Select Screen Aspect Ratio When Extracting DVD** - Users may now select either a 4:3 (default) or widescreen 16:9 aspect ratio when extracting a source DVD to MPEG-2 video in the DVD Extractor Utility.
