

# INTRODUCING inData **TDMobile**<sup>™</sup>

From the makers of **TrialDirector**<sup>™</sup>

Available on the  
**App Store**

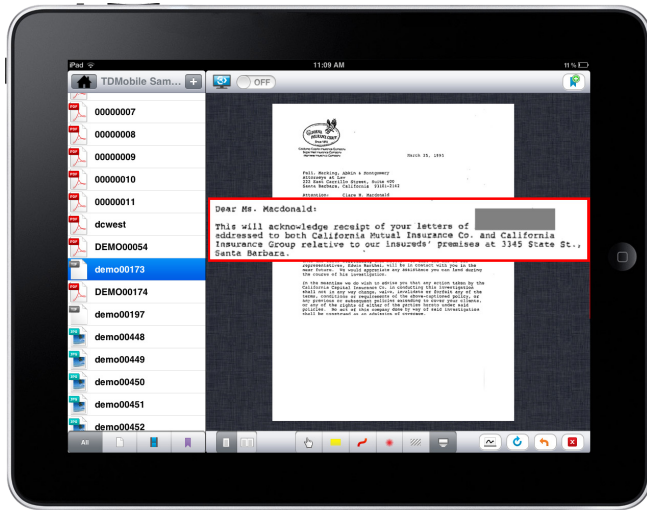

## TrialDirector for the iPad<sup>®</sup>

TDMobile is a simple, easy to use evidence management and presentation tool designed specifically for use with the iPad. With TDMobile, you can create a case folder, add exhibits to your case through a Dropbox<sup>™</sup> or iTunes<sup>®</sup> account and interact with your evidence using the annotation and presentation tools. Or... prepare complex exhibits in TrialDirector and export to TDMobile for presentation.

## Case Management on the Go!

### TDMobile allows you to:

- › Manage multiple case folders
- › Create new case folders right on the device
- › Import entire folders from Dropbox with folder structure intact
- › Import files one at a time from Dropbox
- › Export a workbook from TrialDirector specifically for use with TDMobile.

## Annotation Features

**TDMobile gives TrialDirector users their favorite annotation and markup tools including:**

- Callout Tool - Use multiple callouts from different pages. Callouts can be zoomed, rotated, and placed anywhere on the screen.
- Pen Tool - Multiple colors supported
- Highlight tool - Bright and fully transparent
- Redaction tool
- Laser Pointer tool
- Whiteboard tool

## Video Playback

Jury View

Export your video from TrialDirector with embedded closed caption to an MPEG-4 format. TD Mobile supported formats include industry standards such as:

- H.264 video up to 1080p
- MPEG-4
- Motion JPEG (M-JPEG)

## Other Features

TDMobile also has the ability to freeze output on an external display while you prepare a different exhibit on the iPad. Zoom and Rotate your exhibits with normal iPad touch gestures.
