

INTRODUCING

inData **TrialDirector**[®]
for iPad

Available on the
App Store

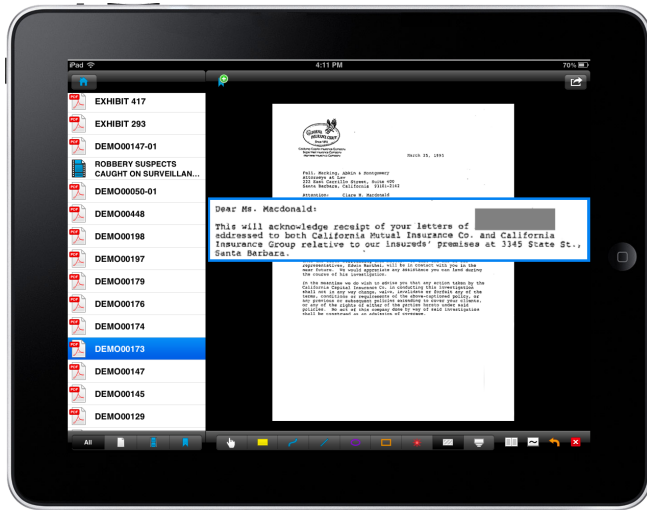

TrialDirector for the iPad[®]

TrialDirector for iPad is a simple, easy to use evidence management and presentation tool designed specifically for use with the iPad. With TrialDirector for iPad, you can create a case folder, add exhibits to your case through a Dropbox[™] or iTunes[®] account and interact with your evidence using the annotation and presentation tools. Or for a more professional and feature-rich experience, prepare your exhibits in TrialDirector 6 and export to TrialDirector for iPad for presentation.

Case Management on the Go!

TrialDirector for iPad allows you to:

- › Manage multiple case folders
- › Create new case folders right on the device
- › Import entire folders from Dropbox with folder structure intact
- › Import files one at a time from Dropbox
- › Export a workbook from TrialDirector 6 specifically for use with TrialDirector for iPad
- › Save annotated document revisions to .PDF

Annotation Features

TrialDirector for iPad gives TrialDirector users their favorite annotation and markup tools including:

- › Callout Tool - Use multiple callouts from different pages. Callouts can be zoomed and placed anywhere on the screen.
- › Pen Tool - Multiple colors supported
- › Highlight Tool - Bright and fully transparent Redaction tool
- › Laser Pointer Tool - To guide the jury's attention
- › Whiteboard Tool - Freeform draw on a white canvas
- › Annotation Tools - Convey your point with an ellipse, rectangle, line, or drawing tool.

Video Playback

Export your video from TrialDirector with embedded closed caption to an MPEG-4 format. TrialDirector for iPad supported formats include industry standards such as:

- › H.264 video up to 1080p
- › MPEG-4
- › QuickTime®

Other Features

TrialDirector for iPad also has the ability to freeze output on an external display while you prepare a different exhibit on the iPad. Zoom and annotate your exhibits with standard iPad touch gestures.
